Zon
News 2014

A flexible screen with a unique and architectonic expression

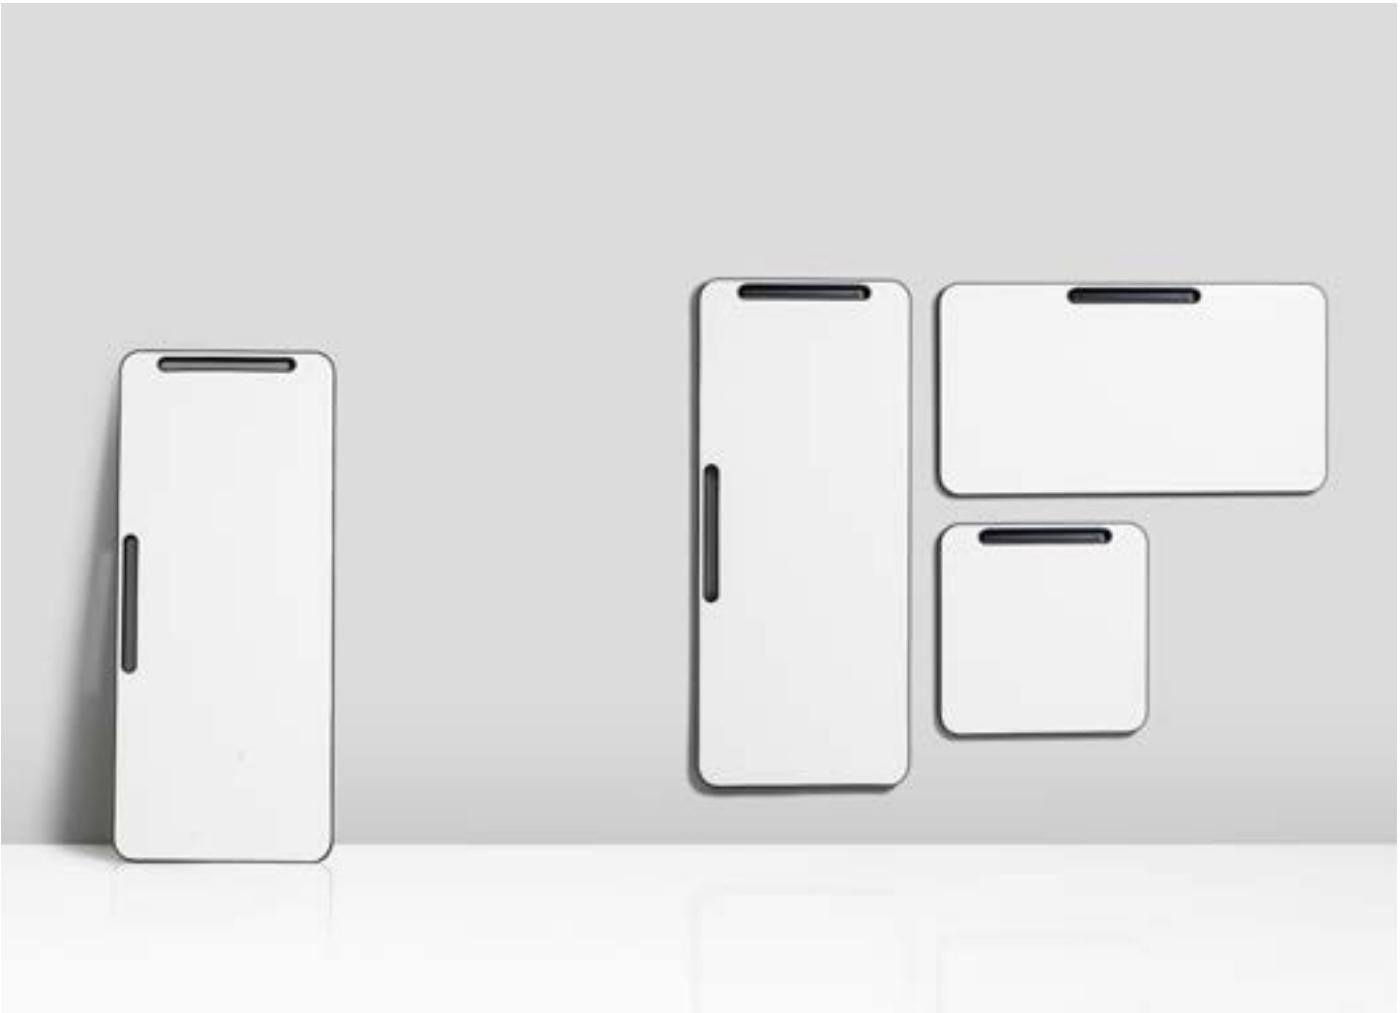

The fundamental idea behind Zon was to design a visual filter for the contemporary, flexible office. A calming divider between you, your meeting and the chaotic surroundings. It's neither a wall nor a conventional office screen. When being behind it you feel secluded but can still sense and see what is going on in the surrounding landscape.

The office environments of today and the future are often designed with more open space and fewer static elements. There is a frequent swap of functions and a demand to easily alternate between creative group meetings and contemplating privacy. Today's offices also more and more reflect the informal feel of the home environment.

The Zon concept pick up on all this. The overlapping felt pads creates a grid construction and a unique, architectural look with plenty of opportunities for change. It is easy to move, remodel, expand or scale down according to the context. It can float free on the floor as an attractive, organic part of the interior or it could help organizing the space by being arranged in straight rows. It can also be suspended from the ceiling as a dividing curtain. It is a highly functional interior unit as well as a decorative element that can be used in an almost sculptural way. With its characteristic expression Zon is also a piece of furniture shaped to work in someone's domestic environment.

As you can see the options of how to use the new and flexible Zon concept are numerous. Probably we have only imagined a small glimpse of how it can evolve, serve and take a natural part in tomorrow's environments.

– **Matti Klenell**

News 2014

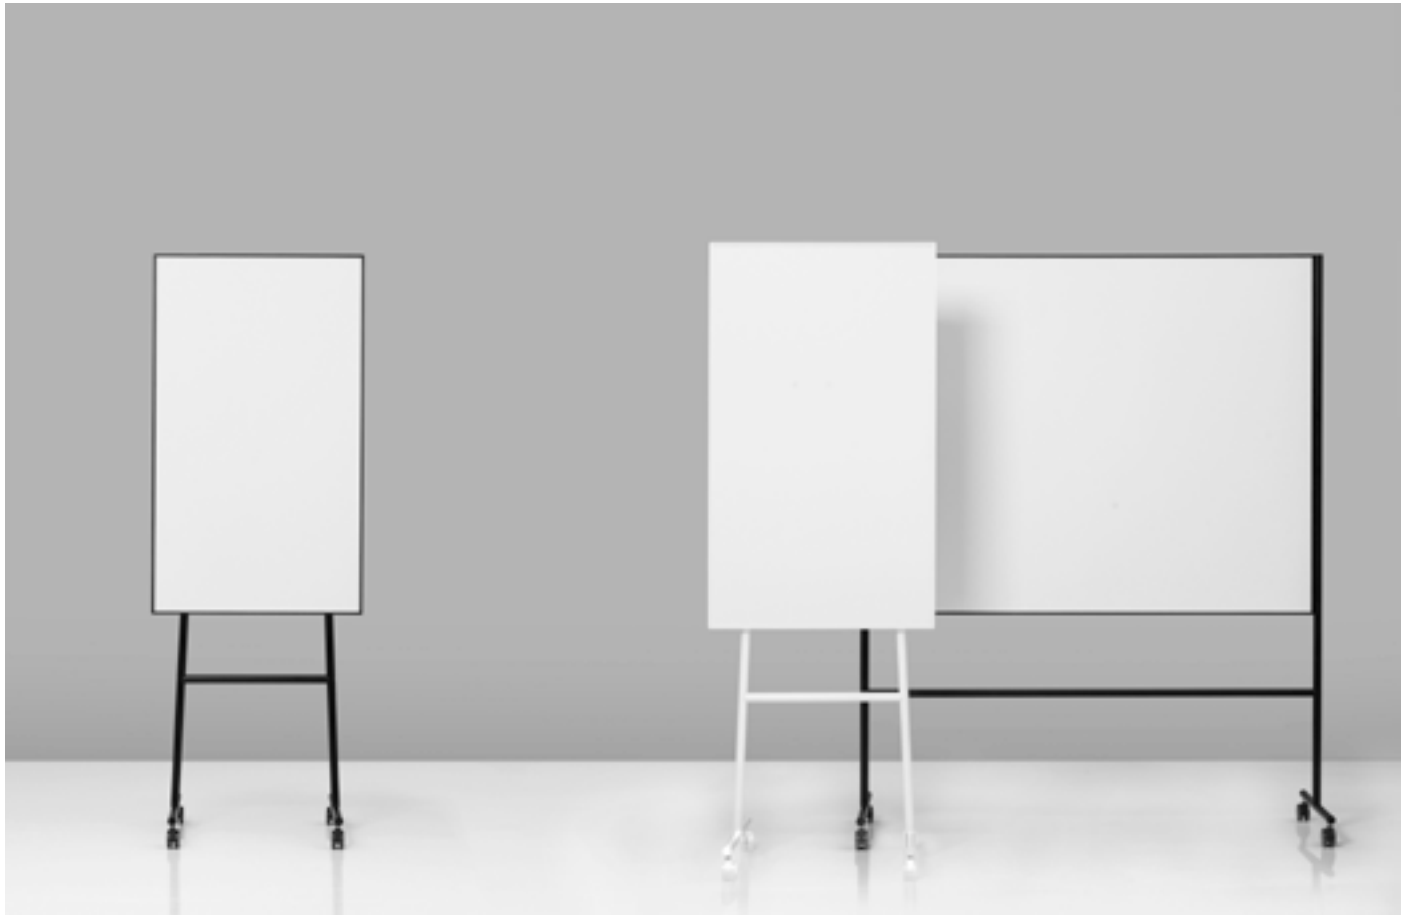

A portable whiteboard – a new product for new habits

Offices are becoming increasingly Mobile, with the traditional office rapidly disappearing. We're turning down desks in favour of sofas or working at the coffee table. So why are things so static in the conference room? The whiteboard should be where it's always been, or should it?

Perhaps we can envisage a more flexible whiteboard that doesn't tie us down or decide where we're going to hold our meetings, but is instead easy to take with us wherever we go? These ideas formed the basis of my work with Note.

I wanted to create a whiteboard that was easy to move, thus radiating Mobileity. Yet its functionality – the actual writing surface – cannot be compromised. In its simplicity – Note is a great new product for those passionate about whiteboards!

– **Fredrik Mattson**

ONE
News 2014

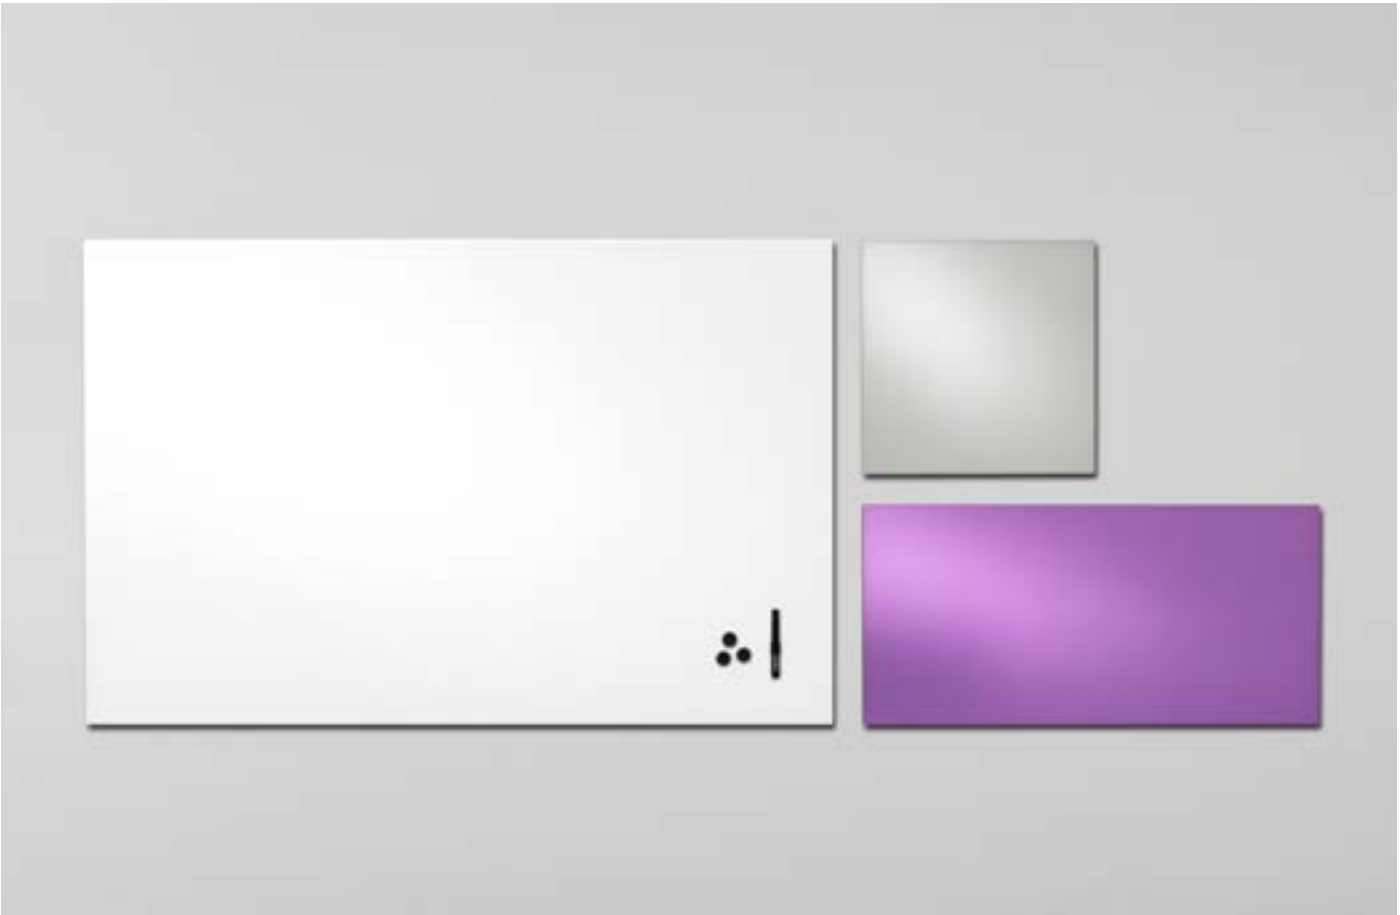

A basic whiteboard family with a softer look

I thought about what a “basic” series could be. I worked on the basis of simple round tubes and a prominent classic picture frame for the whiteboard. These were assembled incredibly subtly to give an abstract impression.

I worked a great deal on trying to make the elements more abstract in order to make a strong impression. I also wanted to give the products a softer and more comfortable feel for their users by, for instance, having a Textile strap support the structure instead of a more mechanical, rigid brace. Another important detail was for the back to be as attractive as the front since the whiteboards are supposed to be freestanding in the room.

By using a few simple elements and subtle overlaps, I wanted to create something that not only had plenty of character, but also still alluded to simplicity and discreet playfulness.

– **Christian Halleröd**

Mood
Product Family

Mood is a minimalistic and stylish magnetic Glass writing board available in 24 different colours. The light and floating expression is obtained by using concealed fittings and by the absence of a framework. The board works both alone and combined with different sizes and colours – and brings, besides its function, a visual expression to the room.

Mood is available in 9 different quadratic and rectangular sizes. The boards can be mounted closely together or with spacing between them depending on the desired expression.

Edge
Product Family

Our Edge screens have a clean, functional design that allows them to be adapted to most environments, regardless of whether the best working, social or personal spaces are the goal.

The Edge series offers ultimate flexibility to create customised workplaces in all sizes of room. The series divides and defines rooms-within-rooms physically and visually, while enabling staff to design functional and aesthetically pleasing office environments – and even adds low-noise acoustics.

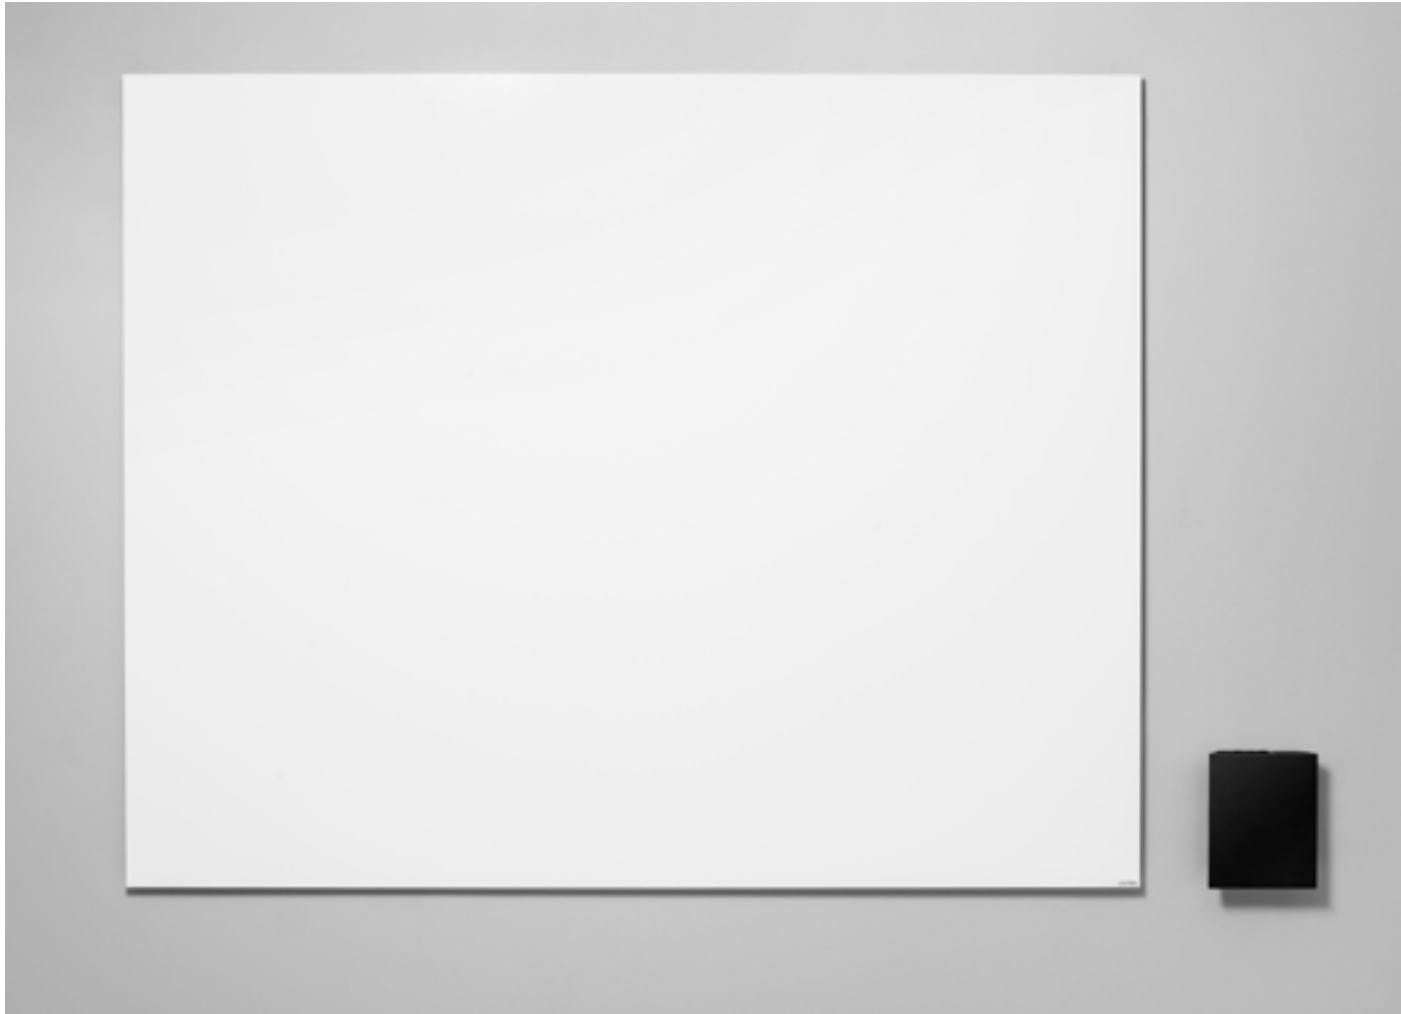

M System
Product Family

M System is a new, innovative, elaborated and colourful presentation and screen concept for offices and public environments, design by Christian Halleröd in cooperation with Lintex. M System gives architects and interior designers a complete system with many combination options.

The system has been produced for an office setting, where demands for flexibility and adaptation to available space are a constant challenge.

During the development process, our basic idea has been to create a clear, flexible and durable whole. The system has a character of its own, and contributes to the architecture of the space. The result is a timeless design with a perfect finish and simple style. The flexibility in the system and the inspiring colour spectrum offer users the freedom themselves to create spaces with a personal touch.

Lintex Whiteboards

We have a good selection of frames for our boards. All have clean lines and designs and can be combined with our writing surfaces to create a personally designed Whiteboard.

Our ceramic steel boards are of the very highest quality and come with a 30-year warranty on the writing surface. The steel sheet core is made from a minimum of 50% recycled material and the boards are up to 99% recyclable. All boards are individually packaged and include fittings for wall mounting.

For the correct article number when ordering boards in other colours, add the following letters before the article number:

BE= beige (felt-tipped pens), NCS S 1005 Y20R	GR=light grey (felt-tipped pens) NCS S 2000N
G= green (chalks), NCS S 7010 G10Y	S= black (chalks), NCS S 8500 N
B= blue (chalks), NCS S 5040 R80B	GG=graphite grey (chalks), NCS S 7500 N

For white boards only the article number is given. White boards have the colour code NCS 1002 G50Y

M1 Wall System

With M1 Wall, unique environments are created for visual presentation and screen systems. M1 Wall comes in both a vertical and a horizontal design. We offer a combination of sound absorption, notice board and writing board. Our standard fabrics are Fiji, Cara and Blazer.

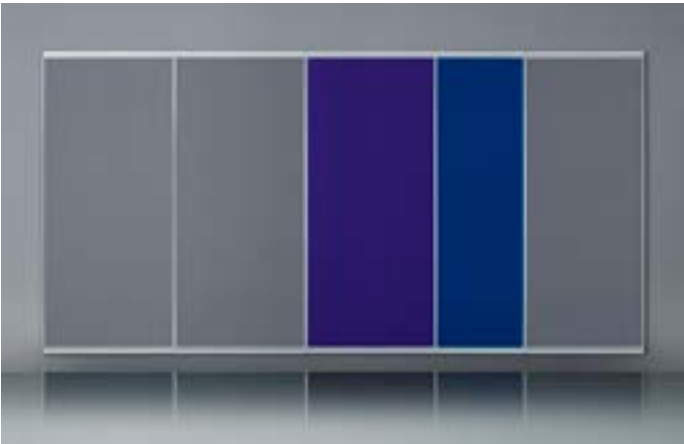

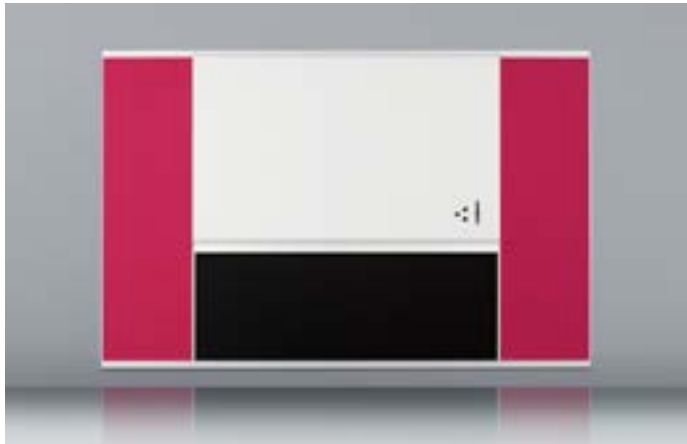

M1 Wall is also available with black frame. Enter 11 as first digits of the article number eg. 11000 instead of 12000.

Also include choice of fabric, see color charts page 67

Air

A tasteful and elegant writing board with no frame at all. With its bevelled edges and concealed mountings, the board appears to float. The board's depth from the wall is 16mm. Our ceramic steel boards are of the very highest quality and come with a 30-year warranty on the writing surface. The steel sheet core is made from a minimum of 50% recycled material and the boards are up to 99% recyclable and e3 certified.

Mood Glass Boards

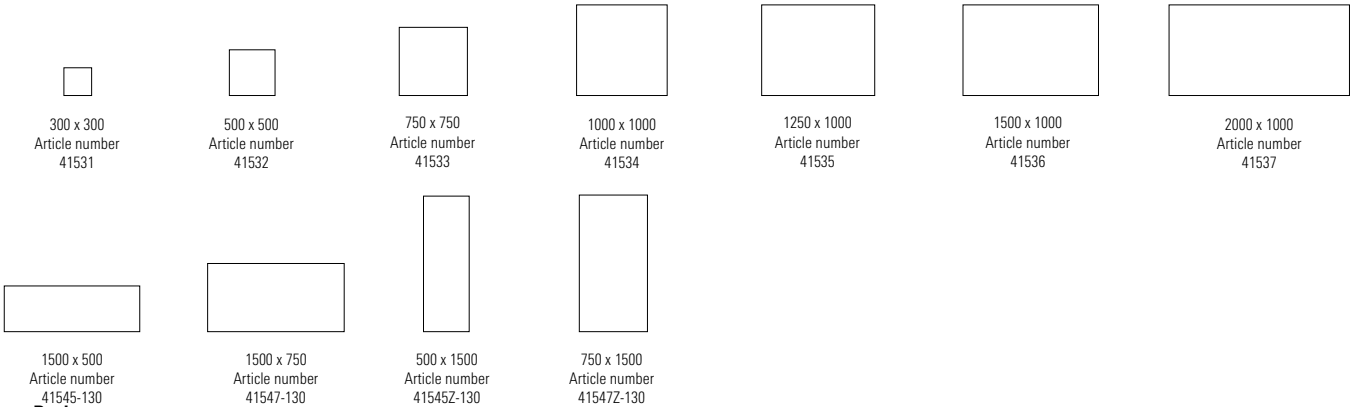

Mood is a minimalistic and stylish magnetic Glass writing board available in 24 different colors, including the Pure optical white. The light and floating expression is obtained by using con-cealed fittings and by the absence of a framework.

The board works both alone and combined with different sizes and colors – and brings, besides its function, a visual expression to the room. Mood is available in 9 different quadratic and rectangular sizes. The boards can be mounted closely together or with spacing between them depending on the desired expression.

Edge Table Screen

Edge table screen has a 30 mm frame of solid wood and a sound-absorbent A-classed filling. The screens are available with fabric Fiji, Cara or Blazer. Other sizes and fabrics are made to order. Edge table screen is shipped ready for mounting on the desk edge or top, and is suitable for all desks and tabletops up to 80 mm thick. Edge Twist makes it possible to join screens of different heights.

75400-FOT	T-foot Edge , stand alone, desk screen	

2be Display Screen

2be is a designer display screen with a number of different functions. It is simple to use and easy to move. The framework is made of aluminium with corners cast from aluminium. The smart feet in cast iron are shipped with castors as standard. If you prefer feet without castors, these are available as optional accessories. The panels are made from Textile-covered wood fibreboards. Paper can easily be attached to the soft fibreboards with pins and tacks. The screens come in two versions - as single screens or as a set of three joined screens.

2be

Available in five standard colours.
When ordering colour, please add the colour code after the article number:

Black Textile, black aluminium frame	SV	Black Textile, nature anodised frame	S

Edge Wall

Edge Wall is a sound absorbent panel that is easily secured to the wall, and now available as part our product range Edge. The wall panel effectively absorbs the disruptive sounds of an office landscape. Each panel is made with a solid wooden framework and 50mm sound-absorbent material. The panels are covered as standard with either Cara or Fiji fabrics.

Article number	Name	Size w x h mm

M5 Konferens

M5 Conference Cabinet is a new product in the Lintex M System series. The conference cabinet has white sliding Glass doors as standard. M5 is also available in all our 24 mood colours. The doors are, as with all our boards, writable and designed for magnets. Behind the sliding doors, there is a Glass enamel writing board, which is suitable for picture presentations using a wall-mounted projector. We can also ship M5 prepared for an LED screen (maximum LED screen dimensions b x h x d 1472 X 765 X 50 mm).

Boarder Rail System

The Boarder rail system is designed for all types of meeting and conference rooms. It facilitates dynamic meetings, smart planning and effective use of wall space. Boarder can be supplied in a number of combinations.

Included in the system are whiteboards, noticeboards and Flip Charts. All items are Mobile and glide easily along the rail. The frames and rails are made of aluminium.

AV-Rail with paper-holding function

Rail with mounting track and paper-holding function. Shipped complete with end stops and white ornamental strips. All boards with standard Boarder frames are suitable for the AV- rail. The paper-holding function also works when the board is attached to the AV-rail. Height 56mm. Depth 27mm. Supplied in standard lengths of 3000mm.

Article number	Name	Mått b x h x d mm
40024	AV-rail with paper-holder function, nature	3000 x 56 x 27
40024V	AV-rail with paper-holder function, white	3000 x 56 x 27
491	Clips, for AV-rail, grey	10-pack
491V	Clips, for AV-rail, white	10-pack

Castor Set

The castor set enables a number of products to be suspended from the AV-railings. It is suitable for all boards with standard frames, Boarder. The castor set includes two suspension brackets with castors and two supporting legs with castors. The set is also equipped with safety catches to prevent unintentional unhooking. We recommend castors for boards with a length up to 2000mm.

Article number	Name
40032	Castor set, Whiteboard , grey

Gliding Flip Chart Easel - tilted, Boarder

The Flip Chart easel is inclined to provide an ideal tilt for writing. Flip Chart holder with adjustable knobs. Equipped with standard Boarder frame and pen shelf. Stand with castors. The unit can also be hung in a corner.

Article number	Name	Size w x h mm
40669	Flip Chart Easel, tilted, white anodised	720 x 1045
40670	Flip Chart Easel, tilted, natural anodised	720 x 1045

Projection Screens HD Wall/ceiling

HD projection screen enclosed in a steel casing. The casing can be mounted on a wall or ceiling. Fittings are included. All of our screens are made from PVC-free, plastic coated weave. The screens have a Gain Factor of 1,0 which gives a viewing angle of 180°. Manually operated screens have a slow retract function by which the screen rolls up smoothly and silently (does not apply to screen sizes above 2000mm). Motorized with switch and IR remote control.

HD Projection Screen portable tripod

A classic tripod screen, easy to erect. White casing, and screen with black edges and white legs.

Article number	Name	Size w x h mm	Weight
694150	Projection Screen, tripod	1500 x 1500	11 kg
694180	Projection Screen, tripod	1800 x 1800	13 kg

Care and maintenance of writing boards

Before using the board for the first time:

1. Clean the board carefully using Lintex H2O or similar. Never use a soap solution!
2. Wait about 15 minutes for the board to dry completely.

Daily cleaning:

Wipe the board using a whiteboard eraser.

Cleaning when a non suitable pen has been used:

1. Clean the board carefully using Lintex H2O or similar. Never use a soap solution!
2. Wait about 15 minutes for the board to dry completely. The slightest amount of residual moisture can leave the board in worse condition than before cleaning. Residual moisture on the surface is not visible to the naked eye.
3. If the board is unusually dirty and stained, use Lintex cleaning set.

Note! Pens and markers intended for use on whiteboards vary in quality and function. If the board is not performing as it should, try changing the brand of pen. If the pens prove to be the problem, the eraser must also be replaced.

Care and maintenance of Glass Boards

Only use pens and markers intended for white boards.

Wipe the board using Lintex Glass board eraser.

Clean the board regularly. Use normal water as cleaning detergents.

Never use a soap solution.

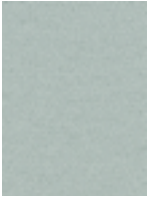

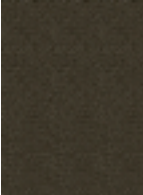

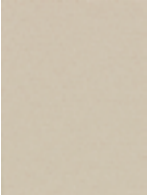

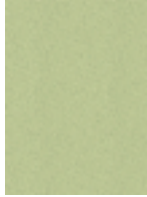

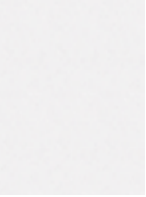

If the board is unusually dirty and stained window cleaner is usable. Remember to clean the board with water afterwards.

Sales and delivery terms

Delivery terms

UK, Benelux, Germany, Austria, France:

Free delivery DDU on orders above €1000 Net.
For orders less €1000 a freight cost of €100 is charged.

Switzerland, Spain, Italy, Ireland:

Free delivery DDU on orders above €1500 Net
For orders less €1500 a freight cost of €200 is charged

Other contries:

Ex Works or according to agreement.

Reservation regarding ownership

Deliveries will only be effected at our terms of payment and delivery. The goods remain the property of Lintex until full payment has been settled

Delivery times

Goods in stock: normally 5 - 8 working days. For other products, inquire about delivery time. Delivery time is reckoned from the day we receive the order. Our confirmed shipping day is the day the goods leave the plant.

Quote

Unless otherwise stated a quote applies for 60 days. Orders are accepted as and when confirmed in writing by Lintex.

Returned goods

The return of goods in Lintex standard range is permitted within 14 days of shipment. When returning goods the customer pays return freight and the products are to be sent in sealed original packaging. Any damage during transport is debited to he customer. Before returning, Lintex sales department must be contacted regarding a return note. Lintex debits the customer 20% return charge on the value of the goods.

Claims

If upon arrival the product is damaged, this shall be noted in the consignment note before receipt is acknowledged. Damage claims shall be notified to the responsible shipping agent. Claims can also be filed 7 days after receipt if the damage was not discovered upon arrival. Other claims due to obvious shortcomings on our part shall be submitted in writing to Lintex.

Payment terms

30 days net. In case of delayed payment, late charges will be debited corresponding to 8 per cent interest above the reference interest rate of the Swedish Central Bank.

Conditional sale

Delivered goods remain the property of Lintex until full payment has been made.

Prices

We reserve the right to raise prices due to rises in raw material prices and currency fluctuations. Articles can also be the subject of constructio- nal and design changes. All prices are exclusive of sales tax.

Guarantee duration

Lintex provides 2 years’ guarantee against defects in manufacture. The guarantee period is reckoned from delivery day and assumes that directly after delivery the products are placed in premises at room temperature and that they are not exposed to abnormal wear or damaging treatment. When mounting or assembling in situ by a fitter recommended by Lintex, 2 years’ guarantee is given from the date of approved inspection.

Lintex whiteboards have Glass-enamelled e3 surfaces in environ- mental ceramic steel. The e3 surface is completely free from environ- mentally hazardous heavy metals and is 99% recyclable. In addition, the e3 surface is extremely durable and has a lifelong guarantee. The board is easy to write on and easy to clean.

Optic Glass has a low content of iron oxide that makes light transmission very high and the colour of the Glass itself insignificant. Optic Glass is the only base Glass that displays white and pastel shades in a natural way. Lintex has therefore chosen to work solely with optic Glass in its range of Glass boards.
